

strange or unusual point of view, but we have observed this in the past, and since the basic reason for the physical isolation of a people such as yourselves is to cause an inner-directed seeking, then it is evident to us that we should follow, as closely as possible, this plan.

"Our craft and our people have visited this planet many, many times in the past. This was done only after the civilization that we visited was ready to accept us. This was done only after the civilization had reached a satisfactory level of inner-directed seeking of the truth of the creation, and therefore it was displaying the principles of love and brotherhood that are the product of this seeking.

"We are at this time forced by conditions over which we have no control to visit the civilizations of your world, even though they have not reached a state of spiritual awareness satisfactorily high enough for our contact. This presents a problem. The problem is that we must approach a part of the peoples of this planet without distressing the rest.

"We are attempting to do this. It is necessary that the evidence of our visits and our communications be of such a nature that it can be rejected or accepted by anyone who is exposed to it. There will be, unfortunately, a degree of infringement upon the people of this planet who do not wish to accept our contact. This is an unfortunate condition, but it is one with which we must deal, since at this time it is necessary that those of the people of this planet who are seeking truth be given truth.

"It will not be necessary to prove to these people that what we are giving them is truth, for if an individual has reached an understanding of truth through the inner-directed seeking of which I spoke, then he will recognize this truth when it is given to him. It is therefore only necessary that we, by some means that will not disturb those who are not seeking our contact, give to the rest of the people of your planet that which they seek in a form that is suitable.

"This, then, is our service: to lend a helping hand up the ladder of spiritual evolution to that part of the people of this planet at this particular time, a time that is unique in the history of this planet, a time that must be dealt with in a more direct and forceful way than previous times and experiences in the history of this planet.

"We are extremely privileged in being able to offer this service to those who seek it: and our service is largely given to them through the process of their daily meditation. If they are to avail themselves to this service, it is necessary that they do so through meditation."³²

* * *

"It is not our policy to fraternize with the natives of any of the worlds we supervise. We did that in eons

past and it brought disaster to all and gave rise to fantastic legends in your own world."³³

* * *

"Karmically we cannot overrun or overrule, as you would put it in your parliamentary terms, your mass desire. We could not do that. Don't you understand that? You are there to set up the desire and to help them have the desire for us. But we cannot interfere, or cannot overrun them. Please understand this basic rule of the universal law. Please, it is very important. Don't expect us to come down and force you into seeing us or accepting us. This must be accomplished from the Earth plane level. Please understand."³⁴

* * *

"We must remember that according to Universal Law, our space visitors cannot interfere with our progress on Earth. Since the Earth is only a classroom in the Father's many mansions certain lessons must be learned before Earthman earns graduation to higher spheres. An eighth grader doesn't enter the first grade to make fun of the students because they do things more simply than himself. Likewise, spacemen aren't going to step in and dictate to us; they are going to let us learn our lessons in our own way, even though they will undoubtedly be painful lessons, for the history of the Earth has proven this to be always true on this sorrowful planet!"³⁵

* * *

"The Space People themselves state that by Universal Law they cannot interfere with man's progression upon the Earth."³⁶

* * *

The one thorniest question asked of ufologists is "Why don't they land?" Or, put another way, "Why don't they contact our governments?" If you accept these contactees' messages, then this thorny question is thoroughly laid to rest.

The UFO-nauts in this particular group look upon planet Earth as a place with one function: the growing of people. Not their bodies, but their spirits. Hence they are concerned only with this people's spiritual growth. They are celestial gardeners here to enrich the etheric soil of mental communication which is available to everyone through meditation.

"We cannot come directly to you, and land upon your surface and speak with you. For it would do no good. We must provide a spark, a clue, something for a start, a start of seeking. Seeking that results in finding the truth that is within you. This, my friends, is the only way to help the people of your planet. For they must help themselves. They must find the truth that is within them. They must initiate the seeking. All that we can do is to provide a stimulus for their own initiation of this seeking."³⁷

* * *

"We of the Confederation of Planets in the Service of the Infinite Creator avail ourselves to this knowledge through meditation. For this reason, we do not come among your people, giving them our service directly, for we are aware of detrimental effects upon them in doing this. Our service is aimed at what they actually desire. What they actually desire is an ability to realize truth. In order to give to them this ability, it is necessary that we bring about a condition to cause within them a personal seeking of service and a personal seeking of knowledge of the truth of the creation. Only through this process can they understand the truth that is within them. It is something that cannot be too effectively given to them in an intellectual manner."³⁸

* * *

"Allow people to read transcripts of these transmissions only when they ask. And only if they ask—never at any other time. We cannot stress this enough. Never force either our, or your, opinions on anyone. People will come to you when they are ready to accept what we have to say."³⁹

* * *

"Each man, and hence each world, must learn the lesson and make its own progression."⁴⁰

* * *

"... they look upon us as younger brothers whom they love dearly, but whom they know must solve their own problems in order to learn the lessons well... "Growth and progress are individual matters. The way may be pointed, but each must travel it for himself. He may choose to travel the main highways, meeting and mastering the lessons brought by each moment, or he may choose detours. The choice lies with each one alone."⁴¹

At this point, we can see fairly well the reason that the craft are here, according to the contactee messages. The UFO-nauts want to help us, if we want to be helped, by sharing with us their philosophy, if you will, or their concept of truth. Or call it their religion, if you must. I personally hesitate to use any of these terms, but especially the term "religion." There is a good deal of feeling caught up in the word itself.

Many scientists think that the studies and beliefs of religion are unscientific. And many clergymen find science to be unreligious or even sacrilegious. I would like to remove this discussion from both camps, and refrain from getting tangled up in

semantics. Whatever your bias, just look at this data with an open mind. Remember that there are always problems encountered in the communication of both scientific and religious concepts.

There is another consideration, too, in studying these contactee messages. We must make allowance for the limitations of vocabulary and religious and scientific expertise of the telepathic receivers of these contactee messages. They could only repeat that which was to some degree comprehensible to their own minds; therefore, we receive largely simplified versions of the original UFO-naut's concepts. Yet these views are most provocative. Here, an entity from Hatonn blends science and religion in a discussion about life itself:

"Life is composed of two materials. One of them is what you might call consciousness. The other is light. But my friends, consciousness is love, and light is its physical manifestation. All that you are able to experience in the way of a physical universe is composed of one ingredient. This ingredient we will call light, since this word is closest to what we wish to express, and it is the only word that we have available in your language to express the basic building block of our Creator.

Originally, the Creator expressed a desire. This desire was expressed in a state of consciousness that is best described in your language using the word, love. The Creator, then, expressing desire through love, caused the creation of all matter. He caused the creation of light. This light was then formed in its infinite configuration in the infinite universe to produce all of the forms that are experienced. All of these forms, then, are moulded or generated through the expression of consciousness that is love. They are composed of a fabric that is light. For this reason we greet you each evening, with the statement "in his love and his light." For this, then, encompasses all that there is.

The consciousness that creates, and the fabric that is love and light.

The love that produces the configuration of light occurs in what we term various vibrations, or, using a word in your language that is not sufficient but somewhat descriptive, 'frequency'—love occurs, then, in various vibrations or frequencies. These vibrations or frequencies are the result of free will. When the Creator produced this original concept, the concept included the gift of freedom of choice to all of the parts that he created. These parts are then totally free to change the original thought. In doing so, they change what you understand to be the vibration of some portion of the original thought.

Each of you here this evening have a vibration.

This vibration is yours, and you have control over it. Your freedom of choice has created the love that manifests the light that is the fabric molded into your physical form.

This is the simplest analysis of all created forms of all of the creation. Each part of it is able to utilize its own consciousness, through the principle of freedom of choice, to vary or change the original vibration. The creation, therefore, continues to be self-generating, in an infinite variety. This was provided for in the original thought of the Creator. It was provided that he might generate, in an infinite way, in an infinite number of forms.

Through this use of freedom of choice, man upon planet Earth has generated many forms. Some of these forms were never envisioned by the Creator with the original thought. However, they were allowed for, due to the principle of freedom of choice.

This is perhaps the most important principle in this creation: that each of the Creator's parts be able, throughout eternity, to select for themselves what they desire. In experimenting with this desire, there has in some instances become a slight problem in straying away from thoughts and desires that would be most beneficial. In experimenting with these desires, some of the created parts have lost contact with the original desire.

This has occurred in many places in this creation. We are here at present to communicate, to those who desire to find their way back to the original thought, information leading those who desire the path back along the path to the original thought. It is necessary that we act in such a way so as to lead only those who desire this pathway along it; therefore not violating the important principle of total freedom of choice.

As I was saying previously, each of you, as do all parts of this creation, have a particular vibration or frequency. This vibration or frequency is the only important part of your being, since it is an index of your consciousness with respect to the original thought.

When an individual is aware of life in its infinite sense, he is also aware of the benefits of matching this vibration with the vibration of the original thought. It is our effort to match our vibration with that of the original thought. This is the reason that we of the Confederation of Planets in the Service of the Infinite Creator are here now. For this service that we perform is a service that would be in harmony with the original thought. This, then, produces within us a vibration more harmonious to the original thought.

We are attempting to give instructions to those of the planet Earth who would seek the instructions how to produce within themselves the vibration that is more harmonious with the original thought. This, as I have stated before, was demonstrated upon your planet many times before by teachers. The last one of whom you are familiar was the one known to you as Jesus. He attempted to demonstrate by his activities his thinking. His thinking was in harmony, much more than those about him, with the original thought. His vibration was, therefore, much more in harmony with the original vibration.

For this reason he was able to work what were called miracles. However, the original thought was that all of the parts of the consciousness that were of the original thought should be able to generate by thought and consciousness what would be desired. The man known as Jesus desired, and therefore created, since the vibration which he generated was in harmony with the vibration which the Creator used to form the creation.

It is only necessary, then, that an individual become in harmony with the vibration that formed the creation in order for him to act within the creation as did the Creator, and as does the Creator. This was demonstrated to you by the one known to you as Jesus. Not only did he demonstrate what could be done in a very small way, but also how to think in order to do this.

Unfortunately, man upon planet Earth has misinterpreted the meaning of this man's life.

At this time we wish to point out the true meaning of this man's life. It was desired that those who were aware of his thinking and his activities then follow the example, and as he did, become more in unison and in a harmonious vibration with the thought of their Creator.

We are here to bring you information and to impress upon you in a nonintellectual way during meditation the idea that is necessary for you to increase the vibratory rate of your real being so that it is harmonious with the original thought of our creator. Our teachings will be simple, as were the teachings of the one known to you as Jesus. It is only necessary that you attempt to understand these teachings. Understand them in depth. Understanding in depth can be done only through meditation.

And then, once these teachings are understood, it will be necessary that they be applied, and that the individual so desiring to apply them demonstrate in his daily activities and in his daily thinking the concept that was the original thought. The concept that we have spoken to you as being love. We have used this word, as I have said, because it is as close as we can come, using language, to the original thought.

However, this word is miniature compared to the original thought. The original thought can be obtained in your intellect, only to a very small degree. It must be obtained in your total being, through the process of meditation.

Once this is done, and once your activities and thinking reflect this thought, your vibration will increase. At this time you will find the kingdom that has been promised to you. It is truly all about you. It is only necessary for you to grow in order for you to receive it. This growth is simple: spend time in meditation and learn of its simplicity.⁴²

All exists, then, in the love and light of the Creator, or to say it another way, all that exists is made of light, directed by love. The concepts of love and light are not exact, the space contacts tell us, but they are the most appropriate words available in our language. Here are correlating passages from several other sources, which repeat the basic thought: some use the word 'love', some the word 'light', and one the word 'energy', but they all are aiming at the same concept.

"But until all men agree about the principle taught by the collective prophets and principal teachings, you can have no equation by which to work all your difficult problems. The equation is that God is love, and love is all; and love is the key, or Spirit is the force, by which all love is possible between men and between planes, planets and forces of nature."⁴³

* * *

"Love is the essence of all creativity. Without love, there would be no life. For it was through love that God received the spark of the idea of creation and conceived the vision of creating man to be a part of Him."⁴⁴

* * *

"... attune the frequency of your own individual being nightly, calling upon that being by whichever name you know that being—the Infinite One, God, the All-Knowing One, Our Radiant One—to send forth His light to assist you in attuning with those frequencies of Light which are being sent forth now at this time into the very core of your own beings."⁴⁵

* * *

'My friends, remember that you are living in a universe of energy. Even you, yourself, are pure energy.'⁴⁶

This concept of a vibration forming light is in precise agreement with the findings of Dewey B.

Larson's revolutionary unified field theory which he calls the Reciprocal System. Larson says,

"If this is a universe of motion in which matter is a complex of motions, then motion is logically prior to matter."⁴⁷

Let's take a look at a further application of the UFO concept that consciousness is prior to matter:

"The creation was initially conceived by our Creator to be of a property so as to reflect the impressions given to it by man. It was so designed as to express his desires in any way that he chose. There are various levels or densities in this creation: levels and densities that are not yet suspected by your physical scientists. Each of these levels is expressing the desires of those of the Creator's children who are acting within it.

Each level or density is moldable or may be acted upon by the thoughts of the individuals within it to a greater or in some cases a lesser extent than that appreciated by those who dwell upon the surface of your planet at this time. It is only necessary to desire an effect to create it. This is what the Creator of us all provided for us. This is not understood at present by the population of the surface of your planet: however, it is in actuality the truth of the Creation that they are experiencing at this time. The conditions that you experience in your daily activities are a result of your thinking and the thinking of those about you and others on your surface."⁴⁸

And again:

"... Thought can also be transmitted on many frequencies... The effect that these frequencies will have in the envelope of your earth will depend on the frequencies of thought. Now you say, "What determines the frequency of the thought?" There are several things there too; the motive back of the thought will determine somewhat the frequency—also the type of thought. For instance, thoughts of resentment, of hate, of fear, each has its frequency, and this frequency has its effect, and will eventually seek out the same vibration or level of vibration in the envelope. As this builds up in the earth's envelope and becomes greater and greater in quantity, it will have its effect upon the earth..."⁴⁹

It is interesting to note, in the context of these messages, that all of the people who are currently able to produce Geller-type effects are generally of the opinion that the way they cause the direct alterations in their physical environment is to want those alterations to occur. They desire that the metal change its shape, or whatever, and this change happens. I speculate that the mechanism of this bending and breaking of materials by mind has to do with the mind's affecting an alteration of the basic vibration or space-time mismatch which Larson identifies as the most basic building block

of the material universe, the photon, or light.

A much greater refinement of this ability would theoretically allow the individual to create his own reality by arranging the vibration of the fabric of space-time as he desired. As he thought, so would it be. It is the reported condition in the finer planes of existence, as reported by astral travelers too numerous to cite. Indeed, the ability to cause changes in our environments by our own efforts of will seems a desirable talent to cultivate. The UFO-nauts tell us how to go about achieving fantastic abilities. The instructions are seemingly simple, yet because of their need to put their concepts into our language, there is always the big question of whether we are able to fully understand what they mean.

Seeking, my friends, is, as we said, extremely important. First, I would like to explain why seeking is important. Seeking is a way of growing. It is in truth for the people of this planet at this time their only way of truly rapidly growing; growing, my friends, in a sense that is spiritual.

The people of this planet at this time are almost all children, in a spiritual sense. Most of them are not at this time seeking spiritual growth. This is very important, if an individual is to rapidly grow, spiritually. All of us throughout all of space are growing, in a spiritual sense. However, some of us are growing much more rapidly than others. The reason for this growth is simply that these are the ones that are seeking.

It is written in your holy works that it is necessary to seek if you are to find. This is with reference to finding spiritual enlightenment. This is in reference to developing the awareness that is necessary for man on earth to develop if he is to take his rightful place in the creation.

We of the Confederation of Planets in the Service of the Infinite Creator are aware that seeking is necessary if one is to get where he wishes to be, and he wishes to be at a higher state of awareness. Look about you, upon your planet. There are many conscious beings, in many forms of life. There are the animals, and birds, and the fish, and man on earth. And each has a state of awareness. But it seems that man has the higher state of awareness. And yet we tell you that this awareness is very minimal. And the awareness of man on earth can be raised to an awareness that he would consider godlike.

But, my friends, this is what was meant for man to have. This is what was the original concept of the

Creator: that this awareness would be possessed by all of his children. This is what it is necessary to seek, if you are to find this awareness.

The reason that it is necessary to seek this awareness is that it cannot be given to you. It is something that each individual must find for himself. It is not a difficult thing to find. It is a very simple thing to find. It is only necessary that the individual go about seeking in a proper way. We are here to attempt to aid those who desire our aid in seeking our awareness, to find it. We will not attempt to confuse those whom we wish to aid with complex lectures on various problems and concepts. We will simply give to them the simplest of the Creator's ideas. For, my friends, His ideas are not complex. It is man; especially man on earth, who has made a complex set of rules and conditions for spirituality. The Creator's concept, my friends, is extremely simple. This we are here to bring to you. It is only necessary then that you seek an understanding of this simplicity. Then, upon understanding it, demonstrate it in your daily lives, and in your activities and associations with your fellow man. Then, my friends, the awareness that was meant for you will be yours. It is an extremely simple process. It is only necessary that, first, man on earth seek.

Seek, my friends. This is what is necessary. This is the first step. Seek awareness. Seek the spirituality that was meant to be yours, and surely you will find it. For this is the Creator's plan: that all of his children should have this.

Seeking, my friends, is extremely simple. And yet, through the powers of your intellect, with the best of intentions it is possible to make it seem complicated.

There is the complication in your vision of the concept of time; and there is the complication in your vision of the concept of space. And you say "Where, and when, may I seek? In what place may I find holy ground? And at what time may I seek the Creator?"

My friends, you are the Creator. For the Creator is you. And, my friends, as it is written in your holy works, the place whereon you stand is holy ground.

There is no complication in time, for all time is here and now.

There is no complication in place, for all place is here and now.

My friends, there is naught but seeking: there is naught but the Creator. It is only necessary for you to turn inwardly, into the light, and enter the light.

"These words are poor, but they lead the way to a new understanding. It is not necessary to have the most perfect meditation or the most proficient

spiritual moments in order to be seeking. It is necessary only to turn your will."⁵⁰

* * *

"So we must desire, we must have the desire, and then we must be willing to work for it, to practice, to develop. You see, we have many powers within us, greater powers than you can imagine, but we must develop them, you see, and as we master one, we become aware of others and we master them, and so we do, on and on, but it requires great effort especially in the beginning. As you gain more confidence in yourself and in your powers to do these things, you see, it becomes easier and easier, for it becomes, it's like it's natural to do this."⁵¹

So we are supposed to seek. But how do we go about seeking? And what is the object of our search?

"There are many ways, my friends, of gaining what you seek. However, what you seek now will change. It will change as you seek it, for this is the nature . . . of seeking. For as you seek, you find, and as you find, you understand. And as you understand, you continue in seeking, but at a different level.

"So do not attempt to understand that which at present seems to be beyond you. Simply go within, and you will be led to an understanding that will place you upon a new plateau, from which you will be able to view much, much more of reality.

"Seeking, my friends, is not a direct attempt to understand each intellectual question which crosses your mind. Seeking is the attempt to know one's Creator. There will be in your seeking an unfoldment of understanding. Each step will show itself to you. When it does, raise yourself upon it, so that you may find the next one.

We bring to man of Earth understanding, and yet we cannot speak to him and cause him to understand. We cannot communicate through channels this understanding. We can only point out directions for his seeking. For it will be necessary for him to change his point of view, and to change it, he must understand; and to understand, he must seek.

"There will be many paradoxes in your seeking, for this is the nature of seeking. But as you continue, these will dissolve, for you will reach a new plateau, and a new understanding. And the seeming paradox that you have bypassed will appear in its true light. Meditation, my friends, is the only method of which we know to allow an individual to rapidly form this new basis for his understanding. For this is not dependent upon preconceptions. It is not dependent upon the definitions of a language that was never intended for spiritual seeking.

"Redefine that which you experience. Redefine it through your seeking, and through your growing awareness of the creation and our Creator.

"And then, my friends, you will not question, for you will know. For you will have grown in your understanding.

"It is sometimes frustrating to be unable to find answers to those questions that seem paramount, and directly in the path of your seeking. But these too will fade, as you pass them by, and become more and more aware of the single truth that permeates all things, and answers all questions. We will continue to aid you in any way that we can, but primarily we will point out to you the wonders and the joys of the creation that you experience. And we will attempt to bring to you an understanding that will be the result of your meditation."⁵²

They realize that they cannot really express themselves fully through our words:

"This is the sad part of their contacting us on this earthy plane of expression, where we are very limited in interpreting mental impressions and meanings into words."⁵³

But they are not hampered critically by this communication handicap, because what they want us to do more than anything is meditate and get in touch with our own higher awareness:

"... we should consider the highest state of spiritual harmony, love, an awareness of which we can conceive and so make this state of consciousness our own personal goal. We should keep revising our goal upward as our concepts and realizations of the nature of our Creator grow and blossom within us."⁵⁴

How can we seek this higher awareness? the UFO-nauts refer again and again to a quotation from our own *Holy Bible*:

"Ask, and it shall be given you; seek and ye shall find; knock, and it shall be opened unto you. For every one that asketh, receiveth; and he that seeketh, findeth; and to him that knocketh it shall be opened."⁵⁵

Once we begin to come into this higher consciousness, say the space brothers, we begin to learn a new way to live, a way focussing on service to others:

"Service, my friends, is very natural. It is the way of the Creator. It is the plan of the Creation. Everything in the creation is performing a service. The vegetation that is abundant upon your planet performs a service. But your people ignore this. The animals upon your planet perform a service, but this is largely also ignored. The flowers, the very air, the water perform a service, but this is ignored. If it were taken fully into consideration, it would become obvious that everything in the creation is there to perform a service. This includes all the Creator's children. Each of you is here to perform a service. This is the plan of this infinite creation. This is how it works. It is only necessary to understand this, and then all things are possible. Unfortunately, upon the planet that you now enjoy, this principle is not understood. Very, very few of those who inhabit the surface of this planet understand the simplicity and totality of this

vegetation upon your planet, as does the atmosphere that you breathe, as do we of the Confederation of Planets in the Service of the Infinite Creator."⁶⁵

* * *

"This is really your purpose, service to your Creator and your fellow man."⁶⁶

* * *

"For know ye all, that whoever aspireth to Me shall come to Me; but the nearest way for many is round about. Ye being above grade fifty are already more to Me and for Me than against Me or from Me, and in equal degree are cast upon your own responsibility. For such is the light of My kingdoms, from the first to the highest: To the child, no responsibility; to grade twenty-five, one quarter; to fifty one-half; to seventy-five, three-quarters; but to the emancipated in my ethereal realms, responsibility not only to self but to all who are beneath.

"Wherein My highest worlds are responsible for the lowest, being bound unto one another through Me for the resurrection of all.

"In this day am I come to deliver My Gods down to the earth, to walk on the earth with mortals, raising them up in My name."⁶⁷

* * *

"You have desired our presence, and we are with you. We are of the Confederation of Planets in the Service of the Infinite Creator. We are always with those of the people of this planet who desire our presence. This is our service to the people of this planet at this time. This is our technique of seeking. It may seem strange that we would seek through service, but this is our understanding of seeking.

"It is stated in your holy works that it is necessary to seek in order to find. We have found many ways of seeking. One of these is to serve your fellow man. And this is our form of seeking at this time. We are seeking understanding of the Creator. For this is our desire. We are seeking this understanding through service. Through serving our fellow man on Earth,

and aiding him in his desire to understand the Creator.

"And through aiding him, and fulfilling his desire, we aid ourselves in fulfilling our desire. For in doing this, not only does man on Earth perhaps learn more of this creation and the Creator, but also we: for it is a law of this Creation that only through service, may one be served. In serving others, we serve ourselves, as even does man on earth. For this was the original idea that generated the entire infinite Creation: the idea of mutual service. The idea of mutual understanding. And the idea of mutual love.

"This we are bringing to man on Earth: an understanding of that that is within him. An understanding of that which created him. An understanding of our service and the need for his. It is unfortunate that there are so many that do not understand the true principles of this creation. We are attempting to help them realize this truth. It is within them, and this is our service: to help them find what they desire to find: the realization of the thought that generated not only them, but all that there is, and the thought that provided that all that there is act in such a way to serve all that there is."⁶⁸

* * *

"We wish to help you find the Father and His blessings as we have done. Sharing with others is one of the great pleasures of life. You will never know great happiness until you can share the love of the Father with someone else."⁶⁹

* * *

"We are all one, beloved ones: and to serve others is only to serve yourself."⁷⁰

The ideals of both our churches and our statesmen are very much in line with this 'space brother' philosophy of service to others. It is just that on Earth, we seldom manage to put these ideals into action. Missionaries and diplomats alike want some return for their service. Indeed, the UFO concept of foreign aid is a revolutionary one!

CHAPTER SIX

THE DEVELOPMENT OF MAN

According to the communications from space contacts, man on earth has something to learn about long-forgotten abilities. According to some of these communications, we all should be able to work "miracles". The problem is diagnosed as being the atrophy of Earthman's basic mental

muscle. Therefore, we see a lot of contactee material on how to regain the natural abilities which at present we now call psychic or paranormal.

Their general attitude is that this mental muscle is not synonymous with the intellect as we know

"... it is not in complexity that we find the Father. It is in simplicity that we find Him."¹⁰

Contactees who are members of the different cultures of Earth receive messages about the spiritual leaders in their particular culture. In our Western culture, the messages most often relate to Jesus.

"This man known to you as Jesus was born into the physical upon your planet. He was able to realize the truth of the creation, and then he was able to demonstrate this truth to those about him. This man came into the physical on your planet as have many teachers in the past. Each of these teachers came into the physical for the purpose of serving the people of this planet. However, it was up to them to carry out this service. Each of them did it in his own way. This is within the limits of our understanding of the intent of our Creator.

"These teachers were limited: limited by the same conditions that each of you and that each of all the people on the planet experience. The people of this planet have misinterpreted the meaning of these men. The people of this planet are at this time misinterpreting the meaning of the man known to you as Jesus. His purpose in his life was to demonstrate that it is possible through an awareness of the Creator's truth, to experience what the Creator planned for each of us. This man worked what was called miracles. These were truly miracles to those who thought of them as miracles, but this was given to each of the Creator's children. He was simply demonstrating the result of thinking in the original way as planned by our Creator. He was also demonstrating that it is possible for anyone, at any time, to demonstrate this type of thinking, and therefore, the abilities that accompany it.

"Unfortunately, the people have very much misinterpreted this man's life and teachings. He was attempting to provide an example of understanding so that each of the children of the Creator could seek the same understanding.

"This is the task of any teacher upon this planet or any other place in the Creation. This is our task at this time."¹¹

* * *

"This man Jesus taught brotherly love of one another, and love of the Father. Through His understanding of the Father and His creation, He was able to demonstrate miracles, as you call them. These were not miracles but normal, natural things that man can do when he realizes his kinship with the Father, and expresses this love of the Father. . . . All mankind are the sons and daughters of the Father, not just one. We respect and love this man Jesus because He, out of many, was able to realize and demonstrate His true relationship with the Father, as all peoples of this planet are capable of doing if they would but learn the truth. . . "¹²

* * *

"There was a teacher once known to you as Jesus. This man had desire. His desire was to serve his fellow man by demonstrating a knowledge of the Creator's love. Through this desire he accomplished things that you know as miracles. This man had true desire. It is only possible to achieve true desire by initiating this yourself. If you are able to initiate a desire that is a true desire, then you will achieve what you desire, just as the man known to you as Jesus achieved what he desired. He achieved what he desired because he desired to serve his fellow man in a way that was in harmony with the desires of the Creator, for he realized his unity with the Creator."¹³

The master known as Jesus, then, was demonstrating the understanding that he was one with the Creator. His vibration thus came into harmony with the vibration of the creation, a vibration of total love. This vibration of the Creator was understood by Him, and he desired that we understand it also. Hatonn speaks to us also on this theme:

"At this time I wish to speak to you upon our understanding of truth. We could give to you many things. We could tell you of many mysteries that . . . would interest you. However, we consider that it is first necessary to first provide for the peoples of this planet a simple truth, that is in reality all that anyone in this creation needs to know. After this truth is understood, the rest of the mysteries vanish, for this truth is the key to a total understanding of creation.

"This truth is the pathway to all truth. I shall at this time speak upon this truth. I and my brothers, who are with me in the name of the infinite Creator, understand a simple truth, that is *the* important concept in this creation. This simple truth is that the creation is one thing. Everything that you can imagine; everything that you can see; everything that you cannot see; all that there is, is one thing.

"This is not realized by most of the people of this planet at this time. Due to this, they are experiencing conditions that they do not desire. It will be necessary, if an individual is to find the pathway that he desires, for him to realize the truth of this simple statement: there is no separation. Separation is an illusion. All things are one thing: the creation. To effect one part of the creation is to effect the creation.

"We are here to aid the people of the planet Earth, but we are here to aid ourselves. It is impossible to give service to others without serving yourself. For you and those whom you serve are the same: you are one."¹⁴

* * *

"Man continually progresses up the ladder toward

them. This is what we are here for: to bring this simple, single message. This is what is necessary for the people of your planet to learn at this time.

"We of the Confederation have lived an example of this knowledge for many, many of your years. We are totally aware of the results of living the type of life that results from the understanding of the principle of love. We are not unwise in our attempt to give these principles to you, for we have experienced the effect of using these for quite some time.

"I am aware that these principles are not understood by the people of your planet, not even the people who have been given them directly, through channels such as this one. There seems to be a barrier to this understanding that has been generated through thousands of years of an ignorance of these truths. This barrier is so solid at this time that it is very difficult, even for those who desire this knowledge, to accept it and put it to use. They are able to hear the words and understand them, and even though they agree totally with the concepts that we present, they are still unable to assimilate them into their own thinking. We have suggested many times that in order to assimilate this knowledge into your thinking it is necessary that you meditate. But this is something that is also misunderstood.

"It is extremely difficult for the people of this planet to remove their thinking from the hypnotic state that has been created. Everything that they experience is created by their own thinking. You cannot experience something that you cannot think, because this is all that there is: there is nothing but thought. It is found in many forms and expressions, but thought is the source of all that there is: the thought of the Creator.

"And this is what you are. And you are able, like the Creator, to generate thought. The thought that you generate is your responsibility. The people of this planet each generates thought, and communicates these thoughts to others. If the thoughts that are generated are of a low quality, then they will in turn generate low-quality thoughts in others. This is a self-perpetuating action. And this is the reason for the strife and confusion that is so abundant with the people of this planet. It is erroneous to say that you cannot do anything about a situation as complex as this one which has been created by millions and millions of minds through thousands and thousands of years. It is only necessary that the individual remove himself in thought from this sea of confusion and express himself in the true love and light of the infinite Creator. This may be done at any time. It is up to the individual. If he desires to do this, then it is only necessary that he do it. This has been demonstrated to the people of this planet many times in the past by the teachers who were here to demonstrate to the people of earth life and the expressions of the Creator as they were intended. It is a very simple lesson, but man on Earth desires to ignore this. Very few accept these teachings, and

stand in the light and express only the love and understanding of the Creator of us all.

"This is unfortunate. It is a situation that we who are in the service of our Infinite Creator are attempting to remedy, by giving instructions which are not only verbal, and which have difficulty in penetrating the barrier which the mind has erected, but instructions of a nature that will bypass this intellectual barrier and reach the spiritual self directly. This is done, of course, during the process of meditation. This is why we have stated, for so many years that meditation is extremely important. It is only necessary that you avail yourself to these concepts for these concepts to begin to cause the individual to realize once more his proper stature and position in the Creator's scheme of things. It was stated by your last great teacher: "Know ye not that ye are Gods?" This man understood the true created purpose of all of mankind. Why is it necessary for people, especially people who have been made aware of truth through their seeking, to stop short of achieving the knowledge of their true created purpose and being?

"We have been puzzled, at times, by the inability of the people in general of this planet to be awakened to this simple truth. We suggest that it is necessary to maintain a continual awareness of your objective. We suggest that that objective is to realize your true position in the creation, and then to act in a manner intended by the Creator. In order to do this, it will be necessary that a considerable effort be put forth. We find that the state of hypnosis brought about by the evolution of thought of the people of this planet is so great that if an individual is to free himself from it, it is necessary for him to maintain a constant awareness of his spiritual nature and purpose, and to augment this awareness with meditation. The effort put forth to do this will be much more rewarding than any other activity that the individual can engage in.

"This step must be successfully made by each individual of this planet at some time or other. Wouldn't it be reasonable to do it at the earliest possible time? For it is an extremely beneficial step. We would suggest that if progress is seemingly slow, then additional meditation may be necessary, for only in this way can the people of planet Earth free themselves from the erroneous thoughts that have been impressed upon them for so very long."²³
"Each part is a portion of the Creation. Each holds equal rank.

"I am aware that there are many upon your planet who would not understand this concept. They feel pain, if it is within their individual being, but they do not feel the pain of others.

"This is not so with the Confederation of Planets in the Service of the Infinite Creator. We feel your pain, and this brings us to you at this time. To serve you. For in doing so, we serve ourselves, since you and we are one. Your pain is felt throughout all of the creation, and for this reason there are many, many

here to serve you at this time. We serve you in the very best way that we can. To eliminate this pain. We give to you the information that you need in order to eliminate this pain. It is something that may be done in the twinkling of an eye. It is the way that the Creator planned. He did not, however, anticipate that his children would create from their own desires the pain that we now feel emanating from your planet.

"This is a result of the desire of the people of this planet. Unfortunately, these desires affect not only the ones generating the desire, but also others who live on the surface. It is what you call a contagion. It requires an extreme degree of understanding to live upon your surface and not experience this contagion.

"It can be done, my friends. It is only necessary that you know and demonstrate the Creator's truth in every thought and deed. And then you will be freed from the effect of the desires of your brothers who live about you on the surface of your planet.

"At this time, very few of the people upon this planet are seeking anything outside of the physical illusion that so constantly busies their minds with trivialities.

"We of the Confederation of Planets are aware of the trivial nature of the things that involve most of the people of your planet. These things seem of great importance to them. However, the importance of their activities is a function of their inability to still their active minds, and return to the awareness of reality that is possible through meditation.

"The activities that seem so important to the people of this planet at this time are so very transient as to be in reality negligible, as are all activities within the physical, except for that activity of service to one's fellow man. For through service, one builds one's awareness of truth. This is the reason for life, as you know it, in the physical."²⁴

"Truth is all about you, very obvious to those who have stilled themselves for the very short time that is required to become aware of it. It is very obvious, to those of us who view the creation of the Father in its original form. All of its parts act to support all of its other parts. All that sustains each of us is a gift of our Creator. All of the joys and experiences that come to us are gifts of our Creator.

"It is only man upon this planet who has become lost in a complex creation of his own, with many thoughts of a complex but trivial nature that keep them very busy, in an effort to reach that which is of no value—a minor creation that will last only the shortest period of time. —Which has no value, once it is attained, for he will lose it, and once again return to the creation."²⁵

"Never allow your mind to be your sole ruler. A man who allows his heart to think will not perish."²⁶

* * *

"The thing is that Man of Earth, in so many cases, has a distorted idea of what is necessary and he becomes rather controlled—under pressures that he feels are necessary and are required by his environment, rather than controlling it. It becomes difficult to withdraw and bring about the realization of his true I AM. When man becomes truly conscious of his oneness with Creation, this takes precedence over all other things, and as this becomes more and more a part of his consciousness, it becomes easier and easier to have a true realization of this."²⁷

One of the larger questions which faces the entity who claims that the Creator is one universal thing, that God is Love, is the question of evil. How can it possibly exist if the universe is all one thing? Here are some thoughts from the space contacts on this.

There are groups who express themselves in ways that were never conceived by the original thought. The original thought, however, provided for no limits on expression. It is possible, therefore, for any of the Creator's children to express themselves in any manner that they desire. For this reason, throughout the creation, there are individuals and groups expressing themselves in infinite numbers of ways. You, at your present state of understanding consider some of the expressions to be evil. We consider them to be expressions. We find that for our purpose, certain expressions to be of a more beneficial nature to our own enjoyment than others. There are, however, expressions of an infinite quality and an infinite quantity occurring throughout the creation. We attempt to serve those within the creation who desire our service. They desire our service because they are interested in our concept of truth. We believe that our concept of truth is correct. In our understanding, we know that our concept is correct. There are many who would disagree with what we understand. This is their privilege.

They do not desire our service. We would freely serve them in any way that we could. However, they do not desire this. Therefore, we do not serve."²⁸

"Evil does not exist. It was not created in the beginning by the Father. It has been created in the mind of man, and can only be gotten rid of by man, through a change in his thinking."²⁹

* * *

"For evil is not of My creation, O man. Evil is brought about by those who falter on the way to Me."³⁰

* * *

"There are many, many myriads of populations throughout the cosmos. Many of them are extremely advanced, and a few of them are not only advanced but also of a nature which you might call evil.

"The Creator is at the end of your path. Your faith is far stronger, if you indeed realize it, than any evil. Remember this, my friends. It is completely within your power, through meditation, to gain the love of the Creator that conquers all lack, limitation, and pain. But my friends, be aware that the only true nature of evil is separation from the Creator. It cannot touch you if you maintain your contact with the one who is all. Nothing from the outside may come in to harm. From the universe of truth and understanding you may show love and light upon all who come into your view.

"Do not fear, my friends. There is nothing to fear. Never waste time in fear, or in hatred, or in anger, for it is only another opportunity at such a time to experience and to demonstrate the love and the light of the infinite Creator."³¹

There is one last thing to be said about evil and our perception of it:

"This is one way of designating in your own consciousness who is of Christ force and who is of the anti-Christ force. You will see many, who will cry out that there is no God, come and fight shoulder to shoulder with you for peace and love and brotherhood equally for all men for all time. This is truly one who is of the Christ force. Yet you will see others, who profess to be of God, speaking words of God, who will say that some are to be saved and some are to be damned. These you will know are not of the Christ light, for the Christ light speaks of brotherhood first and foremost and will defend the right of all men everywhere to share equally with their brothers."³²

It is not just evil in the abstract, but all sorts of troubles of every kind that seem to surround us in the physical plane. As Israel Regardie, a practitioner of white magical arts, says,

"... early in life an impenetrable barrier is erected within the psyche itself. A barrier of inhibition is built up between the unconscious and the conscious thinking self—a barrier of prejudices, false moral concepts, infantile notions, pride and egotism. So profound is this armoured barrier that our best attempts to get past it, around it, or through it are utterly impotent. We become cut off from our roots..."³³

There is a reason for this, according to the ufonauts:

"Every person creates their own world—whether they want to be or not, they are creators. We create our own situations, surroundings. The conditions that we find ourselves in today are a result of past thinking. That is why it is so necessary, so very, very necessary to weed these things out of what you call the subconscious..."³⁴

Hatonn on this subject:

"You are aware upon your planet of night. This darkness is real to you within the illusion that you know as life. There is a simple physical way in which you can intellectually imagine that darkness to be only a local phenomena. The method of that understanding is to imagine that you are observing the solar system from the standpoint of the object that you call your sun. From the standpoint of your sun, there is no night. There is no darkness. There is no lack. There is no limitation. There is only light: an enormously wasteful amount of energy, infinite, self-perpetuating, a type of light that expresses itself in all directions with all of its heart and strength. The concept of darkness, lack, limitation or any petty restriction of any kind is quite foreign to the point of view of the inhabitant of the sun. It is for this reason, my friends, that we often describe to you the love and the light as being like sunlight or some form of light. This light, this phenomena called light, is a spiritual Phenomena. It is one of the two building blocks of your entire universe. Light, with no limitation of any kind, vastly energetic and infinite in its capacity, is the basis for all that is in a physical sense. The shaping, the creating, the molding force is the Consciousness, the Thought which we call love. Love shapes light into the vibration that we know as the physical world. The Creator's love is completely, down to the very smallest detail, a spiritual thing. The lack, the limitation, the darkness and the want is the creation of that most chief of the Father's creations—that being mankind. Mankind is a creator even as his Father wished for him to be. He has created. And those things which he desires are things which he does not truly desire. He has invented a great many different ways to experience lack, limitation, and want. This, my friends, is only true thought from the point of view of the dweller within the illusion who rotates with the planet and sees the sun go down and disappear. A simple shift in point of view, from the point of view of the planet, to the point of view of the Source of light for the planet will enable the understanding of the conditions of the planet upon which you now enjoy the physical existence to come into much clearer focus. We are aware that this is a far more generalized statement than requested. However, there are many things which do not have the spiritual answers themselves, but deal only with the illusion. The ability to change one's point of view will often banish a question and replace the question with understanding simply by the realization of a shift in point of view."³⁵

So the basic distinction which separates the experience of wealth from that of poverty is the inner orientation either towards a state of love and oneness with the Creator and man, yielding abundance, or towards desires and emotions within this physical illusion, which yields lack and limitation. Here the contactees say this in two more ways:

"Earthman . . . must learn to distinguish between love
